Art Unit: 2622

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In all three independent claims applicant specifically refers to storing image data of “one” or “*every first frame period*” and retrieving that data “*in a second frame period*” which does not seem to make sense. It would seem that the process of retrieving image data of one frame period from storage would only involve a single frame period, unless there is an intermediate delay of a frame period. The drawings and specification do not seem to clarify this ambiguity.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art does not disclose or suggest subsequent mixing of frame-converted data that has already had the respective fields mixed, as is recited in all three independent claims.
